COORDINATION CHEMISTRY REVIEWS VOLUME 130, NUMBERS 1–2, FEBRUARY 1994

Contents

Special Issue: Main Group Chemistry Review 1993

Preface vii

Homo- and heteroatomic chalcogen rings
R.S. Laitinen, P. Pekonen (Oulu, Finland) and R.J. Suontamo (Jyväskylä, Finland) 1

Sterically crowded aryloxide compounds of aluminum
M.D. Healy, M.B. Power and A.R. Barron (Cambridge, MA, USA) 63

Linear, cyclic and polymeric phosphazenes
C.W. Allen (Burlington, VT, USA) 137

Bidentate oxygen donor chelates of silicon, germanium and tin
C.Y. Wong and J.D. Woollins (London, UK) 175

Beryllium coordination chemistry
C.Y. Wong and J.D. Woollins (London, UK) 243

Silylenes and disilenes: examples of low coordinated silicon compounds
M. Weidenbruch (Oldenburg, Germany) 275

Tellurium– and selenium–nitrogen compounds: preparation, characterization and properties
A. Haas, J. Kasprowski and M. Pryka (Bochum, Germany) 301

Ligand exchange and reaction mechanisms of fluorinated compounds
A.F. Janzen (Winnipeg, Canada) 355

Recent developments in the chemistry of stable doubly bonded germanium compounds
J. Escudié, C. Couret, H. Ranaivonjatovo and J. Satge (Toulouse, France) 427

From aminosilane to iminosilane
S. Walter and U. Klingebiel (Göttingen, Germany) 481

Coordination chemistry of heavy polychalcogenide ligands
M.G. Kanatzidis and S.-P. Huang (East Lansing, MI, USA) 509
